

AXENT

PRESS RELEASE

AXENT.ONE SHOWER TOILET

The multiple award-winning design of AXENT.ONE is now even more transcendent. With its elegantly curved lines and seamless surface, it is as much a design item as a functional object.

AXENT.ONE turns functionality into user comfort. With the easy-to-use magnetic remote control, you can operate all of AXENT.ONE's exceptional features.

AXENT.ONE has the perfect solution to dealing with dirt, toilet paper and urine – using what is probably the world's most powerful water vortex. The accelerated centrifugal force whisks all waste material away, swiftly and reliably, leaving nothing behind but a sparkling clean toilet. A toilet flushing can be as loud as a vacuum cleaner. Unless it's an AXENT.ONE toilet. The powerful water vortex rinses out the whole toilet bowl at a noise level that's lower than conversational speech.

It's quite simple, really: if there's no rim, then there's nowhere for limescale and bacteria to hide. That's why AXENT.ONE doesn't have an inner rim. As a result, the toilet is easier to clean and therefore more hygienic than conventional models. The powerful flush rinses the whole bowl swiftly and effectively. Bacteria and limescale don't even get a look-in. This clever design means all you need is a cloth to keep your toilet clean. And because you'll be using fewer cleaning products, you'll be helping the environment, too.

AXENT.ONE has the AXENT.Infinity Guard coating, which ensures ultimate protection for your toilet against germs and bacteria. This special ceramic glaze contains silver ions, which reduce microbial growth to an absolute minimum. The bowl, toilet seat and lid all boast excellent antibacterial properties and reduce bacterial load by up to 99.9%. The bowl is also coated with AXENT Easy Clean to make cleaning a cinch.

Stylish hygiene meets state-of-the-art control. All functions and positions can be adjusted with just a small twist using one hand.

AXENT

PRESS RELEASE

AXENT.ONE SHOWER TOILET

Unlike other toilets, AXENT.ONE develops a powerful vortex water circulation to accelerate the water flow. The centrifugal force simply flushes waste away while cleaning the entire surface of the ceramic bowl, leaving nothing behind.

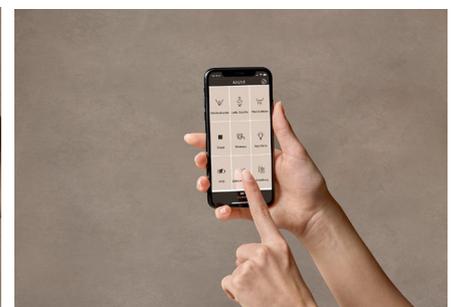

A toilet flushing can be as loud as a vacuum cleaner. Unless it's an AXENT.ONE toilet. The powerful water vortex rinses out the whole toilet bowl at a noise level that's lower than conversational speech. Sounds good, doesn't it?

With shower toilets, it's all about the nozzle. And AXENT.ONE excels here, too: its stainless-steel surface has an antibacterial effect. The nozzle is perfectly positioned above the bowl for the highest standards of hygiene and functionality. It is rinsed with fresh water before and after every use. For a healthy, hygienic and

hassle-free wash experience.

The AXENT.ONE control system is all about ease. All functions and positions can be adjusted with just a small twist using one hand and saved in 5 user profiles. Thanks to the AXENT Smart Control app you can keep in touch with your AXENT.ONE

shower toilet – without touching it. All functions can be controlled via Bluetooth from a clear and intuitive menu. Save your preferred settings or customise the basic functions to suit your needs. The AXENT Smart Control app is available for iOS and Android.

AXENT

AXENT.ONE with Infinity Guard ensures ultimate protection for your toilet against germs and bacteria. This special ceramic glaze contains silver ions, which reduce microbial growth to an absolute minimum. The bowl, toilet seat and lid all boast excellent antibacterial properties and reduce bacterial load by up to 99.9%. The bowl is also coated with AXENT Easy Clean to make cleaning a cinch.

Soft-closing mechanism, quick-release technology and an antibacterial coating: even the AXENT seat and lid are highly innovative. If necessary, the seat-and-lid unit can be easily removed and attached again. The soft-closing mechanism means no loud bangs – for which your entire household will be thankful.

Nature calls at night, but you don't want to switch the light on. With AXENT.ONE you can remain in sleep mode – and stay safe. The built-in night light will show you the way without you having to reach for the light switch. Simply let it come on automatically depending on the ambient brightness or switch the light off completely, if you prefer.

AXENT.ONE redefines modern toilet hygiene and turns the bathroom into a wellness oasis
